QINEO Micro Compact 350 & Micro Compact 350 Pulse – compact and powerful

The new infinitely adjustable mobile MIG/MAG welding machines QINEO Micro Compact 350 & QINEO Micro Compact 350 Pulse are easy to handle, flexible in use and powerful in performance. These synergy-based welding machines are designed for precision work with high-quality results. You will be impressed by the optimum power and weight ratio of the QINEO Micro Compact 350 & QINEO Micro Compact 350 Pulse. The handy welding power sources can be quickly and easily installed by the welder on any welding or construction site, when repairing vehicles or for industrial use.

The modular system allows a further upgrade of the welding machines. So the machines are available with a cooling unit, a carriage with bottle holder and with many more options.

Overview of your benefits

- 1. Versatile applications:** A solution for all welding tasks
- 2. Synergy mode:** Quick setting of the welding parameters
- 3. Easy to use:** Synergy characteristic curves are included in the delivery
- 4. Optimum power and weight ratio** Light, easy to use and very powerful up to 350 A
- 5. Robust construction:** High level of stability of the welding machines

Technical data

QINEO Micro Compact 350 / Micro Compact 350 Pulse	
Welding current	30 A - 350 A
Welding current at 50 % duty cycle	350 A
Welding current at 100 % duty cycle	280 A
Open circuit voltage	60 V
Mains voltage	400 V / 50 Hz / 3 phases
Connection cable	4 x 2,5 mm ²
Mains protection	16 A
Type of protection	IP 23
Insulation class	F
Type of cooling	F
Dimensions L/W/H	740 x 350 x 430 mm
Weight	41 kg
